

DAMAGE

If an attack's damage equals or exceeds a target's Toughness, use this table. Otherwise there is no appreciable effect.

RESULT	TARGET (NOT SHAKEN)	TARGET (SHAKEN)
0-3	Shaken	1 Wound
4–7	1 Wound & Shaken	1 Wound
each +4	+1 Wound	+1 Wound

INCAPACITATED

Extras who suffer a wound are removed from play. If a Wild Card character suffers more than three wounds, he's Incapacitated and must make a Vigor roll:

- 1 or Less: The character dies.
- Failure: Roll on the Injury Table; it's permanent and the victim is Bleeding Out
- Success: Roll on the Injury Table; it goes away when all wounds are healed
- **Raise:** Roll on the Injury Table; it goes away in 24 hours or when all wounds are healed

INJURY TABLE

2d6	WOUND
2	Unmentionables: If the injury is permanent, repro- duction is out of the question without miracle surgery or psionics. There is no other effect from this result.
3-4	Arm: Roll left or right arm randomly; it's unusable like the One Arm Hindrance (if the primary arm is affected, off-hand penalties still apply to the other).
5–9	Guts: A hit to the body. Roll 1d6: 1–2 <i>Broken:</i> Agility reduced a die type (min d4) 3–4 <i>Battered:</i> Vigor reduced a die type (min d4) 5–6 <i>Busted:</i> Strength reduced a die type (min d4)
10	Leg: The victim gains the Lame Hindrance
11–12	 Head: A grievous injury to the head. Roll 1d6: 1–2 Hideous Scar: Your hero now has the Ugly Hindrance 3–4 Blinded: An eye is damaged. Gain the One Eye Hindrance (or the Blind Hindrance if he only had one good eye) 5–6 Brain Damage: Massive trauma to the head. Smarts reduced one die type (min d4)

Bleeding Out: An ally may make a Healing roll to stop the bleeding immediately. Otherwise the injured character must make a Vigor roll at the start of each round: Failure—the character dies from blood loss; Success—roll again next round (or every minute if not in combat); Raise—the victim stabilizes and no further rolls are required.

HACKING OVERVIEW

1. **Hack the Firewall:** Hacking (Firewall Penetration) at TN equal to Defense Rating/Firewall.

Unless a raise is scored, target makes Hacking (Intrusion Detection) to detect intruders.

2. **Perform Actions:** Perform actions using Hacking/ Knowledge (Programing) vs TN equal to Defense Rating/ Firewall.

Sprite may be uploaded. Operates as an Ally.

Actions that do not score a raise triggers chance of detection. Target makes Hacking (Intrusion Detection) to detect intruders.

3. Repeat Step 2 or Log Out.

A character is not in combat he may log out as an action. In combat the character makes a Hakcing roll agains the the network's Defense Rating/Firewall. Failure indicates the character is unable to logout this round.

SYSOP COUNTER MEASURES

	ACTION	RESULT
	Attack the Hacker	As a regular action, a SysOp can attack the character by launching a virus against her TAP.
	Increase Security	SysOp rolls Knowledge (Programming) a success and each raise increase the network'd Defense Rating 1. Increased security lasts until the end of the scene.
	Restore Functionality	Requires a full round action. A successful Knowledge (Programming) roll removes a wound and two with a raise. The roll suffers a penalty equal to the wounds the network is suffer- ing, plus -2 for the network's Shaken status, and any modifiers the SysOp may have (wounds, Fatigue, etc.).
	Shut down the Network	With a full round action the SysOp can shut down the entire network. The network will shut down on the SysOp's next action. Those in the network are forcibly booted take damage based on the damage die type of the network.
	Sound an Alarm	A SysOp can hit the panic button as a free action; alerting security to search the premises for any signs of physical intrusion.
	Run a Trace	The SysOp makes an opposed Hacking (Trace) (or the network's Die Type) vs the target's Hacking (Trace) skill. With a success the SysOp learns the physical location of his target.
