

Multiverse Kit Supplemental 100 Galactic Features

Introduction

A Multiverse Kit Supplemental

Throughout the galaxy there are many rare and wonderful examples of not only nature's glory, but creations from those who once dwelled on small lumps of rocks and now dwell among the stars.

Presented here are 100 features that may be found throughout your galaxy or universe. They may be unique or they could be found 10 per galaxy. Either way they provide new and exciting things for your special explores to investigate.

Note: Although some of these items are decidedly high tech and suitable for a sci-fi setting,

Definitions & Notes

Constructs are artificially built structures.

Planets can cover moons as well.

Space stations can be large or small, not all have access for ships above a certain size and you may need some kind of teleportation system to access them, more so for prisons.

Zones can cover areas small as a star system or large as you wish.
